

Dr. Ahmed Farhan Saeed

PhD, Chongqing University, People's Republic China

Cell: 92-3339191492 II +86-15823019086,

Email: drfarhan@uop.edu.pk

Career Statement

As a highly skilled and accomplished professional with a PhD in Quantitative Economics and expertise in quantitative analysis, I am dedicated to making a meaningful impact in the realm of Quantitative analysis. With a passion for leveraging data-driven insights to address socio-economic disparities, I seek to apply my extensive knowledge and proficiency in quantitative methodologies on various aspects of society.

Area of Expertise

Econometric Analysis, Research Investigations, Data Analysis, Macro and Micro Economics, Economy of Central Asia and China

Distinctions

- Bronze Medal in BSC (Hon's)
- Earned Scholarship for Doctorate Degree
- Received Certificate of being Participant in Cultural Festival of Chongqing University

Education

Postdoc Economics

Session: 2024-25

Institution: Guizhou Normal University, China

PhD in Quantitative Economics

Session: 2013-2016

Institution: Chongqing University, China

M.Phil. in Applied Economics

Session: 2012-2013

Institution: The PARC Institute of Advanced Studies in Agriculture (PIASA), Pakistan

BSc (Hon's) in Agriculture Economics

Session: 2008-2009

Institution: Agriculture University of Peshawar, Pakistan

Achievements

Research work/Projects:

1. International Relations, Geopolitics, and Strategic Studies

Publications:

- Xi Jinping Thought and Its Implications for South Asia: A Comparative Analysis of India and Pakistan (2025)
- China's Geo-Economic Policy Towards Central Asia (2014–2020) (2023)

- US-Japan-China in a Liberal World Order: A Constructivist Perspective (2023)
- Approach to Analyze the US Trade War Against China
- Functionalism and Cosmopolitanism through Economic Prosperity: Iran-Turkmenistan Railway Connectivity (2021)

This area of research reflects an extensive engagement with international relations, strategic affairs, and regional geopolitics, particularly focusing on Asia's evolving social, security and economic landscape. The publications examine China's regional ambitions, South Asian strategic competition, great power politics, regional connectivity, and international trade disputes through both theoretical and empirical perspectives. Drawing upon constructivist, geopolitical, and geo-economic approaches, these studies contribute to understanding how major powers shape regional order, influence economic integration, and redefine international cooperation. Collectively, they demonstrate expertise in foreign policy analysis, regional security, international political economy, and comparative international relations within an increasingly interconnected global environment.

2. Political Economy, Foreign Investment, and Macroeconomic Development

Publications:

- Real Effective Exchange Rate Dynamics and Macroeconomic Stability (2026)
- Asymmetric Effects of Exchange Rate Uncertainty and Political Risk on FDI in East Asia (2024)
- Asymmetric Impact of Uncertainty and Political Risk on FDI in South Asia (2021)
- Comparative Analysis of Health and Economic Growth Nexus (2021)

These publications investigate the complex interactions between macroeconomic variables, political stability, exchange rate dynamics, poverty, development, and sustainable economic growth. Employing advanced econometric techniques, including dynamic panel analysis and time-series modelling, the research explores how uncertainty, political risk, exchange rate fluctuations, and public health influence foreign direct investment and long-term economic performance. By comparing economies across South Asia, East Asia, and developed countries, the studies offer evidence-based policy recommendations aimed at improving macroeconomic stability, investment attractiveness, and development planning. Collectively, this research contributes significantly to international political economy, development economics, and comparative macroeconomic policy analysis.

3. Environmental Economics, Sustainable Development, and Climate Policy

Publications:

- The Carbon Curve of a Rising Power: How Globalization and Energy Policy Shape China's Emissions Pathway (2025)
- Analyzing the Relationship Between Greenhouse Gas Emission and Economic Growth in EU Economies (2021)

This research stream addresses one of the most pressing global challenges, the relationship between economic development and environmental sustainability. The publications analyse greenhouse gas emissions, climate policy, energy transitions, and sustainable growth within both developed and emerging economies. Through empirical analysis, the studies investigate how globalization, industrialization, and energy policies influence environmental outcomes while maintaining economic competitiveness. The work contributes to debates surrounding green growth, climate governance, and environmental economics by offering comparative insights into policy choices and sustainable development pathways. These publications demonstrate interdisciplinary expertise linking economics, environmental policy, and global sustainability.

4. Crime, Security, and Public Policy

Publications:

- The Impact of Remittances on Crime Rate: A Case Study of Pakistan (2024)
- Socio-Economic Determinants of Crime in Malaysia (2025)
- Narrative Resilience and Strategic Recalibration: An Analysis of TTP Propaganda Following the Afghan Taliban's Ascendancy (2024)

These studies examine the multidimensional relationship between crime, terrorism, socio-economic development, and public policy. Combining quantitative and qualitative approaches, the publications investigate how economic conditions, migration, remittances, and extremist narratives shape crime patterns and security challenges across different national contexts. The research extends beyond traditional criminology by incorporating political violence, terrorism, and strategic communication into broader discussions of governance and public security. By integrating economic analysis with security studies, these publications provide valuable policy recommendations for crime prevention, counter-terrorism strategies, and evidence-based governance, contributing meaningfully to contemporary debates on human security and national resilience.

5. Constitutional Law, Governance, and Comparative Political Systems

Publications:

- Through the Lens of Bolshevism: A Comparative Examination of Constitutions of Pakistan, Afghanistan & RSFSR (2021)

This area of scholarship reflects an interdisciplinary engagement with constitutional law, comparative governance, and political ideology. Through comparative constitutional analysis, the research examines the historical evolution of constitutional systems and ideological influences on state formation and governance structures. By comparing Pakistan, Afghanistan, and the former Russian Soviet Federative Socialist Republic (RSFSR), the study explores constitutional development within broader political and historical contexts. The publication contributes to understanding constitutional evolution, legal institutions, comparative political systems, and state-building processes, while demonstrating the author's ability to integrate legal scholarship with comparative political analysis and historical inquiry.

6. Media, Communication, and Strategic Narratives

Publications:

- The Dominant Dimension through the Lens of Print Media (2021)
- First Urdu Newspaper in Germany for WWI Muslim Prisoners of War (2021)

These publications examine the role of media, communication, and historical narratives in shaping public opinion, identity formation, and political discourse. Combining historical research with media analysis, the studies investigate the strategic use of print media in both contemporary and historical contexts, including wartime communication and public information campaigns. The research contributes to understanding how media functions as a tool of political influence, identity construction, and historical memory. By integrating communication studies with history and political analysis, these publications demonstrate expertise in media discourse, strategic communication, and the historical evolution of information systems.

7. Agricultural Economics, Rural Development, and Technology Adoption

Publications:

- Technical Efficiency of Strawberry Growers in Khyber Pakhtunkhwa (2021)

- Determinants of Poultry Technology Adoption in Balochistan (2022)

This research focuses on agricultural productivity, rural livelihoods, and technology adoption in developing economies. Using advanced quantitative methodologies, the studies evaluate farm efficiency, agricultural innovation, and factors influencing technology adoption among farming communities. The findings provide practical recommendations for improving agricultural productivity, enhancing rural incomes, and strengthening food security through evidence-based policy interventions. By linking agricultural economics with rural development and technology diffusion, these publications contribute to sustainable agricultural development and demonstrate expertise in applied econometrics, agricultural policy analysis, and rural economic transformation.

8. Human Resource Management and Organisational Development

Publications:

- Excavating the Premonition of Downsizing in a Telecom Company of Pakistan (2015)
- Human Resource Strategy: Enhancing Organisational Performance Through Effective HRM (2023)

These publications examine organisational behaviour, strategic human resource management, and workplace performance within both public and private sector organisations. The research explores employee perceptions of organisational change, procedural justice, distributive justice, interactional justice, and strategic human resource practices that influence productivity and institutional effectiveness. By integrating behavioural theory with organisational management, the studies offer practical insights for improving employee engagement, organisational resilience, and performance management. This body of work demonstrates expertise in organisational psychology, human resource strategy, leadership, and institutional governance while contributing to contemporary debates on effective workforce management.

9. Trade, Regional Integration, and Economic Connectivity

Publications:

- The Diversionary Implications of Non-Tariff Barriers to Pak-Afghan Bilateral Trade (2022)
- Functionalism and Cosmopolitanism through Economic Prosperity: Iran-Turkmenistan Railway Connectivity (2021)

This research stream explores regional economic integration, international trade, and cross-border connectivity within Asia. Employing gravity models and international political economy frameworks, the publications analyse the effects of non-tariff barriers, regional infrastructure, and economic cooperation on trade flows and regional development. The studies provide policy-oriented recommendations for improving bilateral trade, strengthening regional integration, and promoting sustainable economic connectivity. By combining economic modelling with international relations theory, these publications contribute to understanding the relationship between trade policy, regional cooperation, and long-term economic prosperity across strategically significant regions.

10. Interdisciplinary Public Policy, Comparative Development, and Applied Social Sciences

Publications:

- Comparative Analysis of Health and Economic Growth Nexus (2021)
- Real Effective Exchange Rate Dynamics and Macroeconomic Stability (2026)
- Socio-Economic Determinants of Crime in Malaysia (2025)
- Impact of Remittances on Crime Rate in Pakistan (2024)
- Carbon Curve of a Rising Power (2025)

These publications demonstrate a strong interdisciplinary approach to public policy analysis, integrating economics, governance, environmental sustainability, health, security, and social development. Through rigorous empirical methodologies and comparative international analysis, the research addresses complex policy challenges facing both developed and developing countries. The work consistently combines theoretical innovation with practical policy relevance, producing evidence-based recommendations that inform decision-making across multiple sectors. This diverse portfolio reflects the author's ability to conduct high-quality interdisciplinary research while making significant contributions to public policy, sustainable development, comparative

Experience

Position: Assistant Professor

Organization: Area Study Centre (Russia, China and Central Asia), University of Peshawar, Pakistan

Duration: March / 2018- till date

Job Description:

1. Teaching and Supervision:

- Deliver lectures and seminars on economics, poverty, to MPhil and PhD scholars.
- Supervise PhD and MPhil scholars throughout their research journey.
- Guide students in research design, methodology, data analysis, and thesis writing.
- Assess student work and provide constructive feedback.

2. Research and Publication:

- Lead qualitative and quantitative research projects using advanced econometric methods.
- Publish research findings in peer-reviewed journals.
- Prepare technical reports and policy briefs for government and non-governmental stakeholders.

3. Curriculum Development:

- Contribute to the design and revision of economics courses.
- Integrate data science and quantitative methods into the curriculum.
- Ensure course content remains current and relevant to the discipline.

4. Academic Leadership and Service

- Serve on departmental and institutional committees.
- Mentor junior colleagues and research assistants.
- Participate in journal reviewing and professional academic service.

5. International Collaboration

- Engage in joint research with international partners.
- Co-author papers with researchers across borders.
- Participate in global academic conferences and networks.

6. Administrative functions:

- Support the Director of Center in managing the center affairs
- Participate in the advance study board meetings and center academic committees

Position: Adjunct Faculty

Organization: School of International Education, Guizhou Normal University, China

Duration: 2023 till date

Job Description:

1. Teaching and Course Delivery:

- Deliver lectures and seminars in economics, international studies, poverty, social economics, socio-economic development, and related fields.
- Prepare course materials, syllabi, and assessments.
- Evaluate student performance and provide constructive feedback.
- Integrate discussions on poverty, inequality, social justice, social policy, and socio-economic development into course content.
- Design modules that examine the relationship between economic development, social welfare, and human well-being.
- Address social issues in economics including gender, labor, migration, social protection, and community development.
- Examine the socio-economic determinants and consequences of crime and social exclusion.

2. Student Mentorship and Academic Writing

- Mentor students in research design, methodology, and academic writing.
- Guide students in developing research proposals, term papers, and dissertations.
- Support students in improving their academic writing and analytical skills.
- Supervise student research on topics related to poverty, inequality, social policy, socio-economic disparities, and international development.
- Encourage students to critically examine the root causes and consequences of poverty, inequality, and social exclusion.
- Guide students in exploring the intersection of economics with social issues such as gender, migration, and labor markets.

3. International Academic Collaboration

- Contribute to international collaboration through teaching and research activities.
- Engage with international colleagues and institutions on academic initiatives.
- Participate in cross-cultural academic exchanges and programs.
- Collaborate on comparative studies examining poverty, inequality, social policy, and socio-economic development across different countries.
- Contribute to international research networks focused on social economics, development, and human well-being.

4. Research Contribution

- Conduct research in economics, international studies, poverty, social economics, and socio-economic development.
- Investigate the socio-economic determinants of inequality, crime, social exclusion, and human well-being.
- Examine the social impacts of economic policies on vulnerable populations.
- Publish research findings in academic journals and conference proceedings.
- Present research at academic conferences and seminars.
- Prepare policy-oriented research outputs on poverty alleviation, social protection, and socio-economic reform.

5. Cross-Cultural Engagement

- Foster cross-cultural understanding within the classroom and academic community.
- Support international students in adapting to the academic environment.
- Promote cultural exchange through academic and extracurricular activities.
- Facilitate dialogue on global socio-economic challenges, including poverty, inequality, and social justice, from cross-cultural perspectives.
- Encourage students to understand economic issues through diverse cultural and social lenses.

Achievements:

- MPhil and PhD Research Supervised: I supervised 13 PhD and MPhil research scholars and 6 scholars' supervision is underway.

Position: Assistant Professor

- **Organization:** Area Study Centre (Russia, China and Central Asia), University of Peshawar, Pakistan
- **Duration:** 2016 -2018
- **Job Description:**

1. Teaching and Instruction

- Taught undergraduate and postgraduate courses in economics, international economics, development studies, public policy, and research methodology.
- Designed and delivered student-centred curricula integrating theoretical concepts with practical applications and contemporary policy issues.
- Promoted critical thinking, analytical reasoning, and evidence-based problem-solving through innovative teaching approaches.

2. Research and Scholarly Activities

- Conducted interdisciplinary research in macroeconomics, political economy, international trade, environmental economics, governance, and regional security.
- Led and contributed to research projects addressing contemporary economic, social, and public policy challenges.
- Produced high-quality, policy-oriented research with national and international relevance.

3. Research Supervision and Mentorship

- Supervised master's and doctoral research, providing guidance on research design, econometric modelling, policy analysis, academic writing, and publication.
- Mentored students and early-career researchers in conducting rigorous, evidence-based research and developing professional academic skills.
- Supported research dissemination through conference presentations and scholarly publications.

4. Publications and Academic Dissemination

- Published extensively in internationally recognised peer-reviewed journals across economics, international relations, governance, and development studies.
- Presented research findings at national and international academic conferences, seminars, and scholarly forums.
- Contributed to advancing knowledge through interdisciplinary and policy-relevant academic publications.

5. Research Methodology and Data Analysis

- Applied advanced quantitative and qualitative research methodologies, including panel data analysis, time-series econometrics, stochastic frontier analysis, gravity modelling, and comparative policy analysis.
- Utilised statistical and econometric techniques to evaluate complex economic, political, and social issues.
- Promoted methodological rigour and evidence-based analysis in research and policy evaluation.

6. Policy Analysis and Advisory

- Developed evidence-based policy recommendations relating to economic development, international trade, foreign investment, governance, environmental sustainability, and climate policy.
- Conducted comparative policy analysis to inform public sector decision-making and institutional reforms.
- Bridged academic research and policy practice through applied research and advisory work.

7. Curriculum Development and Academic Quality Assurance

- Contributed to curriculum design, programme development, accreditation processes, and continuous quality improvement initiatives.
- Participated in academic quality assurance and institutional research strategy to strengthen teaching and research standards.
- Supported the development of innovative academic programmes aligned with emerging global trends.

8. Faculty Development and Academic Leadership

- Mentored junior faculty members and research scholars, fostering professional growth and academic excellence.
- Promoted interdisciplinary collaboration, research partnerships, and a culture of scholarly innovation.
- Encouraged collaborative research and capacity-building initiatives across academic disciplines.

9. Academic Governance and Institutional Service

- Participated in academic committees, examination boards, curriculum review panels, and university governance structures.
- Contributed to institutional planning, strategic development, and academic policy formulation.
- Supported the implementation of academic regulations and quality assurance mechanisms.

10. Collaboration, Partnerships, and Knowledge Exchange:

- Strengthened partnerships with government agencies, research institutions, universities, and international organisations to advance collaborative research and policy engagement.
- Facilitated interdisciplinary research networks and institutional collaborations at national and international levels.
- Promoted knowledge dissemination through research partnerships, policy dialogue, academic outreach, and stakeholder engagement.

Position: Economics Teacher

- **Organization: (HK) Elite Education College, International Department Affiliated with Southwest University, Southwest University, Chongqing, China**
- **Duration: March / 2018- till date**
- **Job Description:**
 - 1. Teaching and Instruction**
 - Delivered undergraduate-level courses in economics, international economics, and development studies using student-centred and interactive teaching methodologies aligned with international academic standards.
 - 2. Curriculum Development**
 - Designed lesson plans, course materials, and assessment strategies that strengthened students' analytical, quantitative, and critical thinking skills while meeting programme learning outcomes.
 - 3. Student Supervision and Mentoring**
 - Supervised student research projects and provided academic guidance on research methodology, data analysis, academic writing, and professional development.
 - 4. Assessment and Academic Quality**

- Evaluated student performance through examinations, assignments, presentations, and continuous assessment, providing timely and constructive feedback to enhance academic achievement.

5. Academic Service and Institutional Contribution

- Contributed to curriculum enhancement, academic quality assurance, and interdisciplinary learning initiatives, supporting the delivery of high-quality education within an international academic environment.

Individual Consultant

Organization: UN Women

Project “Challenges Faced by Women Employees at the Workplace: A Gender-Based Case Study at Gadoon Amazai Industrial Estate Swabi.”

This was a research project funded by UN Women and my role included field research, development of methodology and report writing.

Principal Investigator

Organization: Higher Education Commission of Pakistan

Project: “Technical Efficiency of High Value Agriculture” for following key responsibilities.” This was a research project and my role as principal investigator included; identification of cropping pattern and production system; identification of data sources and data needs; quality assurance on data gathered; instrument / questionnaire for field work, field work, data analysis, and report writing.

Researcher

Khyber Pakhtunkhwa Revenue Authority

Project: Estimate Realizable Revenue Potential

I worked on a joint project and my responsibilities included supervising the YPO's, Identification of Sector, on desk research, secondary source of data identification, questioner development and testing, and data analysis.
